S21ZI Bangladesh –update by Karl G0SK June 13

'Day 4 and I'm having a blast! Just over 1600 calls in the log. I'm no expert and a single radio, single op. The CW pileups are fantastic as are the FT8 ones. Signals are not that strong from EU but I'm trying my best to work everyone. Please spread out a bit! If calling on FT8 normal mode, please don't send your grid square – I don't need it and it speeds things up. Still constant power cuts but it's something I'm learning to live with. Thank you to everyone who has worked me, and sent me messages and emails, it's very much appreciated. Hope to get many more in the log. I'll be very sad to leave this wonderful place.'

FT4GL Glorioso Islands –update via <https://ft4gl.blogspot.com/>

As you know, Marek is active in his free time which means during the day but also in the evening, and has been for two nights in particular. There is no hotel with on-site home service; the rooms are not numerous and you have to share them with other occupants. Marek installed an outdoor station so as not to disturb his colleague in his sleep who occupies the usual room. In order to give the chance to NA who have an opening at night in the direction of Glorieuse, he takes his sleep capital for YOUR PLEASURE, before starting a day of work.

Marek has just communicated the two days he wishes to dedicate to ATNO. It is for people who HAVE NEVER CONTACTED FT4GL — on **Friday, June 14** and **Sunday, June 16 from 11 a.m. UTC..** Thanks to the stations who already made the QSO to play the game and give the LITTLE PISTOLS a chance. If this turns into a nightmare, blame the troublemakers and not Marek who wants to give everyone a chance.

FW7JV Wallis & Futuna –update by AA7JV

*'We will be challenged by both the season (mainly on the low bands) and FWS antenna restrictions. Ahead of Jarvis DXpedition we want to do as much testing as possible. We have new antennas and an expanded remote operator network. Both need testing. This will also give DXers an opportunity to test their stations (and perhaps put a new one in their log.) During **FW7JV** we will be testing low band antennas on 160, 80 and 40. As well as some testing of a new 40/20m antenna.'*

HF0PI Peter I Island –info

The following recently appeared on QRZ.com under the callsign **HF0PI**
Let's dispel the myth that Peter I Island is 'Norwegian', that only 3Y0 licences can be used there and landing permit can only be given out by Norwegian Polar Institute. None of this is correct. Peter I Island is *NOT* Norwegian territory.

At latitude of almost 69 Degrees South, Peter I Island lies well inside the Antarctic Treaty Zone and as such is international territory; same as South Shetlands, South Orkneys and all other Antarctic lands & ice shelves below 60 South Latitude. Norway can maybe claim the Island for itself, but most countries (including Argentina, Chile, most of Europe, Poland, Russia & the USA) do not even acknowledge or recognize this claim. 3Y0 callsigns and NPI entry permits are therefore not mandatory or exclusive.
